## BRIEFLY I

I have been dealing with PHP and C# since 2013. Although I developed games as a hobby in 2015, my interest shifted to Node JS and React JS technologies in 2018. In recent years, I have been offering mobile solutions to many people and institutions with React Native.

## MY PROFESSIONAL EXPERIENCES

2021 – present  
İstanbul

**(Side Job) Software Teaching, SmartPro Bilgisayar Akademisi** 

I teach new students on PHP, React, React Native and JavaScript on certain days of the week.

2021 – present  
İSTABUL

**React Developer, Gökkuşuğu Yazılım** 

We produce web and mobile solutions as well as solutions such as ERP and CRM. My task here is to complete frontend operations of projects with React and Node JS.

06/2020 – 07/2021  
İSTABUL

**Fullstack Developer, Litesoft Yazılım Hizmetleri** 

In Litesoft Software Services, where we provide software support to many companies, we produce web and mobile solutions as well as solutions such as ERP and CRM. My task here is web and mobile software expertise using languages like React, ASP.Net, PHP.

2019 – 01/2020  
İSTABUL

**PHP Developer, Special Education Institution**

I have done many web design and PHP programming jobs for educational institutions.

2012 – 2018  
Kastamonu

**Frontend Developer, Teknik Reklam**

I started graphic design work at a very young age. I used to design small car lettering stickers before. In the following years, I have done many works such as illuminated and non-illuminated signage, facade cladding, social media advertising design, web design and programming.

2015  
Kastamonu

**IT Intern, Special Provincial Administration**

Within the scope of the compulsory high school internship program, I had an internship in the field of information processing for a total of 9 months in Kastamonu Special Provincial Administration. During this period, I got to know the computer better, both in terms of software and hardware.

2016  
Mersin

**Software Intern, Teknorum ARD Computer**

I did web design and programming internship at Mersin Teknorum Bilgisayar within the scope of compulsory university internship. During this time, I had experience with web software and the ways to be followed in terms of design.

## PROJECTS

### **Cruelty Free Products**

The practice that determines whether a product is used or not in animal testing.

[https://github.com/Gorgeous-Devs/cruFree\\_Android](https://github.com/Gorgeous-Devs/cruFree_Android) 

### **Staff Tracking App, React Native**

Personnel tracking application for Vakıfbank Marketing department. Leave and start-up tracking system

### **CRM Project, React and Electron JS**

In this project, which I developed using React and Electron JS, business management and CRM solutions were provided for the company.

## MY EDUCATIONS

2019
